Baptism Martin E. Marty From the earliest days of Christianity, baptism has been a foundational act of faith for the believing community. Although churches may (and do) disagree about whether infants should or shouldn't be baptized, about whether baptism should be by "immersion" or "pouring," and about other doctrinal details-all would agree that baptism mattered to early Christians and still matters. And yet for all too many, baptism remains a ritual hardly understood, and one that seems to lack relevance for the lives we lead from day to day. Here is a book that delves into the mystery, brings understanding, and connects the "water and Word" of baptism to the tragedies and triumphs of daily life. With good humor, sound scholarship, and down-to-earth common sense, Martin Marty demonstrates how baptism can be "used" from day to day in a vibrant life of faith.

Preparing NEPA Environmental Assessments Charles Eccleston 2012-05-08 Although upwards of 50,000 environmental assessments (EAs) are prepared annually—compared to some 500 environmental impact statements (EISs)—the focus of U.S. National Environmental Policy Act (NEPA) regulations is on defining requirements for preparing EISs. Written by Charles Eccleston and J. Peyton Doub, who have established themselves among the top environmental experts in the world, Preparing NEPA Environmental Assessments: A User's Guide to Best Professional Practices fills the need for an authoritative and comprehensive guide on how to prepare EAs. Bridging the regulatory gap, this book identifies relevant EIS regulatory requirements that can be logically interpreted to also apply to EAs. It compiles and synthesizes information scattered throughout NEPA's regulations, executive orders, and guidance documents, and incorporates case law to provide additional clarification. The authors also draw on the professional experiences and best professional practices (BPP) of NEPA practitioners. From the fundamentals to more advanced topics, the book presents a consistent methodology to help beginners, students, and professionals manage, analyze, and write legally sufficient EAs. It addresses dilemmas that have traditionally plagued preparation of EAs, provides BPPs, tools, and approaches for resolving problems, and introduces methods for streamlining the EA process. Building on Eccleston's previous guide to EAs, Effective Environmental Assessments: How to Manage and Prepare NEPA Assessments (2001), this book reflects the rapid changes in government policy over the past ten years. An indispensable source of practical information, it provides readers with step-by-step direction and best practices for preparing defensible EAs.
