**Abigail Adams** Woody Holton 2010-06-01 Winner of the Bancroft Prize The New York Times Book Review, Editor's Choice American Heritage, Best of 2009 In this vivid new biography of Abigail Adams, the most illustrious woman of the founding era, Bancroft Award-winning historian Woody Holton offers a sweeping reinterpretation of Adams's life story and of women's roles in the creation of the republic. Using previously overlooked documents from numerous archives, Abigail Adams shows that the wife of the second president of the United States was far more charismatic and influential than historians have realized. One of the finest writers of her age, Adams passionately campaigned for women's education, denounced sex discrimination, and matched wits not only with her brilliant husband, John, but with Thomas Jefferson and George Washington. When male Patriots ignored her famous appeal to "Remember the Ladies," she accomplished her own personal declaration of independence: Defying centuries of legislation that assigned married women's property to their husbands, she amassed a fortune in her own name. Adams's life story encapsulates the history of the founding era, for she defined herself in relation to the people she loved or hated (she was never neutral), a cast of characters that included her mother and sisters; Benjamin Franklin and James Lovell, her husband's bawdy congressional colleagues; Phoebe Abdee, her father's former slave; her financially naïve husband; and her son John Quincy. At once epic and intimate, Abigail Adams, sheds light on a complicated, fascinating woman, one of the most beloved figures of American history.

**Introduction to Financial Accounting** Henry Dauderis 2019 This textbook, originally by D. Annand and H. Dauderis,

was intended for a first course in introductory financial accounting. It focuses on core introductory financial accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. A corporate approach is utilized versus beginning with a sole proprietorship emphasis and then converting to a corporate approach; this consistency throughout the book reduces confusion for the introductory student. This most recent revision by D. Marchand converted the text from IFRS to reflect the Generally Accepted Accounting Principles of the United States (U.S. GAAP).

With more than fifteen years of experience in conducting market research, Beall details the strategic principles she has developed that impact the way in which market research can inspire and change an organization. *Latoya Ruby Frazier: The Last Cruze* Latoya Ruby Frazier  
2020-06-15 As the General Motors plant in Lordstown, Ohio halted production and faced possible closure, displacing its workers, artist LaToya Ruby Frazier joined with these workers, their families, and their local union leaders to tell the story of the plant in its final days. After more than fifty years of automobile production and a commitment to manufacture the Chevrolet Cruze until 2021, the facility was recently "unallocated" by GM, as the company shifts its focus toward overseas manufacturing and the production of electric and autonomous vehicles. For many, this meant uprooting their families and giving up the support of a close-knit community. Those who turned down transfers to GM plants in other states lost their income, pensions, and benefits. The Last Cruze, which sets out to amplify the voices of the auto workers in Lordstown, introduces a new chapter to Frazier's work in investigating labor, family, community, and the working class. Exhibited at the Renaissance Society in 2019, this body of work includes over sixty photographs, alongside the written stories of the workers, and was staged within an installation that echoes the structure of the plant's assembly line. This substantial catalogue includes extensive documentation of the work and introduces new essays and dialogues by contributors including Coco Fusco, David Harvey, Werner Lange, Lynn Nottage, Julia Reichert, Benjamin Young, and members of the local chapter of the United Auto Workers.

**Project Based Teaching** Suzie Boss 2018-09-20 It's no

secret that in today's complex world, students face unparalleled demands as they prepare for college, careers, and active citizenship. However, those demands won't be met without a fundamental shift from traditional, teacher-centered instruction toward innovative, student-centered teaching and learning. For schools ready to make such a shift, project-based learning (PBL) offers a proven framework to help students be better equipped to tackle future challenges. Project Based Teachers encourage active questioning, curiosity, and peer learning; create learning environments in which every student has a voice; and have a mastery of content but are also comfortable responding to students' questions by saying, "I don't know. Let's find out together." In this book, Suzie Boss and John Larmer build on the framework for Gold Standard PBL originally presented in *Setting the Standard for Project Based Learning* and explore the seven practices integral to Project Based Teaching: Build the Culture Design and Plan Align to Standards Manage Activities Assess Student Learning Scaffold Student Learning Engage and Coach For each practice, the authors present a wide range of practical strategies and include teachers' reflections about and suggestions from their classroom experiences. This book and a related series of free videos provide a detailed look at what's happening in PBL classrooms from the perspective of the Project Based Teacher. Let's find out together. *Botanical Speculations* Giovanni Aloï 2018-10-16 Ground-breaking scientific research and new philosophical perspectives currently challenge our anthropocentric cultural assumptions of the vegetal world. As humanity begins to grapple with the urgency imposed by climate change, reconsidering human/plant relationships becomes essential to grant a sustainable future on this planet. It is in this context that a multifaceted approach to plant-life can reveal the importance of ecological interconnectedness and lead to a more nuanced consideration of the variety of living organisms and ecosystems with which we share the planet. In *Botanical Speculations*, researchers, artists, art historians, and activists collaboratively map the uncharted territories of new forms of botanical knowledge. This book emerges from a symposium held at the School of the Art Institute of Chicago in September 2017, and capitalizes on contemporary art's ability to productively unhinge

scientific theories and certainties in order to help us reconsider unquestioned beliefs about this living world. *Fundamentals of Financial Accounting* Fred Phillips 2021 "Fundamentals of Financial Accounting responds by using carefully chosen focus companies that students recognize and engage with in their everyday lives. Such a power differential must be neutralized if Blacks are to prosper in the 21st century ... Aptly titled, 'Blueprint for Black Power' stops not at critique but prescribes radical, practical theories, frameworks and approaches for true power. It gives a biting look into Black potentiality.
