The Longest Kill Craig Harrison 2015-05-21 Through conflicts in the Balkans, Iraq and Afghanistan, this is the vivid memoir of British sniper Craig Harrison. It takes a tough mindset to be a successful sniper, to be able to dig in for days on your own as you wait for your target, to stay calm on a battlefield when you yourself have become the target the enemy most want to take out. Craig Harrison has what it takes and in November 2009 in Afghanistan, under intense pressure, he saved the lives of his comrades with the longest confirmed sniper kill – 2,475 metres, the length of twenty-five football pitches. In *The Longest Kill*, his unflinching autobiography, Craig catapults us into the heat of the action as he describes his active service in the Balkans, Iraq and Afghanistan, and gives heart-stopping accounts of his sniper ops as he fought for his life on the rooftops of Basra and the barren hills of Helmand province. Craig was blown up by an IED in Afghanistan and left battling severe PTSD. After his identity was revealed in the press he also had to cope with Al Qaeda threats against him and his family. For Craig, the price of heroism has been devastatingly high.

The Death of Comedy Erich Segal 2009-06-30 In a grand tour of comic theater over the centuries, Erich Segal traces the evolution of the classical form from its early origins in a misogynistic quip by the sixth-century B.C. Susarion, through countless weddings and happy endings, to the exasperated monosyllables of Samuel Beckett. With fitting wit, profound erudition lightly worn, and instructive examples from the mildly amusing to the uproarious, his book fully illustrates comedy's glorious life cycle from its first breath to its death in the Theater of the Absurd.

She fails to find meaning in anything around her, but in her search she strips situations of their conventional values and sees them in a sharp, new light." --Publisher's description.

Red Cliff Bernard Beckett 2000 There is a new feeling now when I wake in the morning. A feeling I am moving forward. I can tell I am growing stronger, and it's not just physical. Soon, when people think of Carissa, the most popular girl at Stanway, they will think of me too. Samuel and Carissa. Nothing can ruin it. Not the stupid new house, not the designer valley that surrounds it. If I am patient, if I work to a plan, this will be my year. But plans have a way of falling over, and other people have a bad habit of getting in the way. People like Kurt, with his made-to-order smile, or Leon, bigger

than any teenager has a right to be. People like Carissa, who has her own nightmare to live. Then there's Samuel himself, and all the trouble he attracts. He'll need to be even stronger than he imagines. This is some year. Whether or not it's Samuel's won't be decided until the very end. Here is a remarkable new novel from Wellington teacher and writer, Bernard Beckett, to follow his stand-out debut, *Lester*. *Red Cliff* explores themes of revenge and the unveiling of secrets through the eyes of a teenage boy. Unlike the tragic *Lester*, this novel ends on a high note, in which the best of human nature wins out. The themes and incorporation of different narrative styles should appeal to teachers while the authentic voice and powerful climax - in which families and friendships and the force of nature erupt imultaneously - ensure it's a genuine page-turner for its target readership.

In this brilliant and suspenseful novel, Anax's examination leads us into a future where we are confronted with unresolved questions about technology and humanity, artificial intelligence and the nature of consciousness. "A philosophical inquiry of sorts into a favorite and time-tested conundrum: Can a machine achieve consciousness, and if so, what should its relationship with its creators be?" —The Wall Street Journal

Lullaby Bernard Beckett 2015-05-27 Rene's twin brother Theo lies unconscious in hospital after a freak accident left him with massively disrupted brain function. There is hope though. An experimental procedure—risky, scientifically exciting and ethically questionable—could allow him to gain a new life. But what life, and at what cost? Only Rene can give the required consent. And now he must face that difficult decision. But first there is the question of Rene's capacity to make that decision. And this is where the real story begins. Bernard Beckett is a multi-award winning author of books and plays for young adults and one of New Zealand's most outstanding writers. In 2006 Bernard was awarded a fellowship for a project examining DNA mutations. This new direction in his life led to the publication of the sophisticated sci-fi novel *Genesis*, which has since been published in over twenty countries and was the winner of the 2010 Prix Sorcieres. He lives near Wellington with his wife and twin sons. 'Lullaby is an amazingly complex novel, exploring the nature of identity and shared memories as well as how we shape the story of ourselves. The questions it raises stay with the reader for a long time after the book is finished.' New Zealand Herald 'This book is promoted as Young Adult, but many older adults will enjoy it too. Clever and thought-provoking.' BookMooch 'It was incredible. The complexity of the storyline was nothing short of delicious and encouraged that deep, emotional thinking that is lacking in the majority of young adult novels.' Diva Booknerd 'It is a rare kind of young adult book that aims to leave the reader with more than just the usual afterthoughts of the story. Beckett encourages the reader on his or her own philosophical journey.' Book Kat 'This is a fascinating exploration of the notion of self, how far people will go to save those they love, and what scientists will do to advance their research. Well worth reading, and when you've finished, let me know what you thought of the end because I'm dying to discuss it!' Nicole Has Read, Blog 'This book is a beautiful example of a thought experiment, with characters you feel for, and stories that you enjoy every moment of.' Booksellers NZ 'Lullaby is very eerie science fiction which, in the telling of the story, discusses the dilemmas that medicine could find itself in when the desire to break new frontiers clashes with ethical principles...Confronting, terrifying and challenging.' Reading Time 'Bernard Beckett's biggest strength isn't that he is able to convey high-minded sci-fi concepts to his usual audience of young adult readers – it is the power of the concepts themselves...It's exciting to see a recent scientific concept such as the connectome (a map of neural connections in the brain) used to drive dramatic tension and ask big questions.' Cosmos

Juno Of Taris Fleur Beale 2010-12-01 What happens when life in a perfect, protected bubble unravels? The heroine of the first novel in an exciting sci-fi / fantasy series for young adult readers is about to find out. This exciting, futuristic novel with a strong heroine and a compelling storyline won Fleur Beale the Esther Glen Award 2009 and was shortlisted for the 2009 NZ Post Children's Book Awards. It explores the struggle of Juno, a young teen on the verge of adulthood, who is torn between her need to fit in and belong in her society, and her growing discomfort and questioning of that society's rules. Your ordinary teen? Not quite! Because Juno lives — in the not-too-distant future — on Taris, a bubble-covered island in the Pacific, to which a select few hundred people were evacuated when Earth's inhabitants took everything just a bit too far and began to self-destruct. On Taris there are many rules governing appearance, behaviour, even procreation ... but all are for the good of the community, to ensure the survival of humankind. Or are they? As Taris' protected environment begins to break down and Juno's questioning nature takes hold, she uncovers some startling inconsistencies in many of the 'factual' histories she has grown up with. She also begins to develop some quite startling, almost supernatural, abilities. As Juno faces increasing danger, she finds allies in the most surprising places. *Juno of Taris* examines many themes: peer pressure, environmental breakdown, the fictionalization of history, societal control and challenging authority. But perhaps most important of all, it is a thoroughly good read from one of New Zealand's very best writers for young adults.

Mariposa Greg Bear 2011-12-12 The world just keeps getting tougher and more complicated. America teeters on the edge of bankruptcy because of crushing foreign debt and an apparent savior, The Talos Corporation, delivers training for soldiers and security forces around the world, logistical support and badly-needed troops economically, but with a hidden cost that's both sinister and disturbing. The three rookie FBI agents who survived the challenges portrayed in Quantico, have gone their separate ways but seem fated to be drawn back together in an alliance against a surprising challenge for which no one seems prepared. Rebecca Rose is brought back from an extended sabbatical when the President is shot and her second-in-command is implicated in a horrific crime - and all the threads point deeper into Talos's secretive activities. Fouad Al-Husam, working undercover inside Talos, has uncovered and been forced to hide vital information of a takeover plot that threatens America's independence. Nathan Trace, victim of a violent incident in the Middle East, struggles with post-traumatic stress and seems to be recovering through participation in a treatment program, code-named Mariposa, which has unexpected side-effects that turn patients into brilliant, detached and sociopathic individuals - very smart and extremely deadly. Only a desperate combination of misfits and survivors can combat an apparently inevitable collapse of American organization that will lead to the fall of democracy.
