Race to the Top. Tennessee Report. Year 1 Department of Education (ED) 2012 This State-specific summary report serves as an assessment of Tennessee's Year 1 Race to the Top implementation, highlighting successes and accomplishments, identifying challenges, and providing lessons learned from implementation to date. Tennessee received its Race to the Top grant in July 2010 as part of the first round of the competition. Since receiving the award, the State has made progress implementing

several initiatives, including integrating the First to the Top (FTTT) Act goals and objectives into daily operations, aiding the LEAs' transition to new Common Core State Standards (CCSS), and designing and implementing a new educator evaluation system. The State is supporting LEAs in their transition to the CCSS by providing trainings, a crosswalk between the existing State standards and the CCSS, and pacing guides to help connect the new standards to professional growth. Over the past year, TDOE provided introductory training to more than 4,000 educators statewide on the CCSS.

Additionally, most of the State's LEAs are voluntarily implementing the CCSS standards in kindergarten through second grade in school year (SY) 2011-2012. Tennessee encountered some impediments to the implementation of its Race to the Top plan during the first year of the grant. After winning its Race to the Top award, Tennessee elected a new Governor who then appointed a new Commissioner of Education. Although the new Governor collaborated with TDOE staff prior to taking office, and both he and his new Commissioner are committed to education reform, the transition to new leadership was not seamless. The time required to fill key leadership positions impacted both TDOE's project timelines and its capacity to support LEAs. TDOE also experienced turnover within the assessment, data systems, and educator evaluation offices. During the summer of 2011, the Commissioner engaged in a strategic planning process and is considering how to fill vacancies and hire additional staff at TDOE in alignment with the agency's key priorities needed to drive student achievement at the classroom level. Tennessee learned valuable lessons during the first year of Race to the Top that will inform TDOE as it continues to foster supportive relationships with LEAs and schools. In Year 1, the State offered guidance, trainings, and in-person support to LEAs and schools on several Race to the Top initiatives, including TVAAS, the CCSS, and the TAP observation rubric. The guidance and resources provided by the State built stronger relationships with LEAs to ensure successful implementation of many foundational Race to the Top initiatives in Year 1. A Glossary is included. (Contains 13 footnotes.) [For the parent report, "Race to the Top Annual Performance Report," see ED529267. For the full report, "Race to the Top. Tennessee. A Little SPOT of Feelings and Emotions Educator's Guide

Inspiring Greatness in Education Edward Zigler 2014 One of the major domestic policy issues of our time is whether our nation can provide a more effective educational experience for our children. Economists have stressed that the quality of our educational system eventually defines the ability of our workforce, which in turn affects our competitive position in the world market. This issue has earned increasing attention in light of recent reports that students in many nations perform at higher levels of educational competence than children in America's schools. *Inspiring Greatness in Education* describes the 21st Century Schools program (21C), a whole-school reform model developed by Edward Zigler over 20 years ago and since then has been in a constant state of testing, implementation, and scaling up. The goal of 21C is to promote optimal child development, which should become manifest in sound educational performance. In practice, 21C provides preschool education as well as good-quality child care before and during the school years, in combination with a number of other family supports. This book will provide an in-depth case study examination of the experience of the Independence School District in Independence, Missouri. The Independence School District embraced School of the 21st Century concepts in 1988, becoming the first urban school district in the nation

to do so. This book reveals and documents Independence School District's success as a national model for 21C programming, as well as the experiences, testimonials and opinions of parents, students, teachers, administrators and community officials. By focusing on the impetus and history of the 21C concept, its organic evolution and its applications at the Independence School District, this book is designed to inform, educate, and inspire all who read it and to serve as a model for other school districts that want to achieve similar successes.

Teaching to the Math Common Core State Standards F. D. Rivera 2014-02-05 This is a methods book for elementary majors and preservice/beginning elementary teachers. It takes a very practical approach to learning to teach elementary school mathematics in an emerging Age of the Common Core State Standards. The Common Core State Standards in Mathematics (CCSSM) is not meant to be "the" official mathematics curriculum; it was purposefully developed primarily to provide clear learning expectations of mathematics content that are appropriate at every grade level and to help prepare all students to be ready for college and the workplace. A quick glance at the Table of Contents in this book indicates a serious engagement with the recommended mathematics underlying the kindergarten through grade 5 portions of the CCSSM first, with issues in content-practice assessment, learning, teaching, and classroom management pursued next and in that order. In this book we explore what it means to teach to the CCSSM within an alignment mindset involving content-practice learning, teaching, and assessment. The CCSSM content standards, which pertain to mathematical knowledge, skills, and applications, have been carefully crafted so that they are teachable, learnable, coherent, fewer, clearer, and higher. The practice standards, which refer to institutionally valued mathematical actions, processes, and habits, have been conceptualized in ways that will hopefully encourage all elementary students to engage with the content standards more deeply than merely acquiring mathematical knowledge by rote and imitation. Thus, in the CCSSM, proficiency in content alone is not sufficient, and so does practice without content, which is limited. Content and practice are both equally important and, thus, must come together in teaching, learning, and assessment in order to support authentic mathematical understanding. This blended, multisourced text is a "getting smart" book. It helps elementary

majors and preservice/beginning elementary teachers work within the realities of accountable pedagogy and develop a proactive disposition that is capable of supporting all elementary students in order for them to experience growth in mathematical understanding necessary for middle school and beyond, including future careers.

So what Do They Really Know? Cris Tovani 2011 In *So What Do They Really Know?* Cris Tovani explores the complex issue of monitoring, assessing, and grading students' thinking and performance with fairness and fidelity. Like all teachers, Cris struggles to balance her student-centered instruction with school system mandates. Her recommendations are realistic and practical; she understands that what isn't manageable isn't sustainable. Cris describes the systems and structure she uses in her own classroom and shows teachers how to use assessments to monitor student growth and provide targeted feedback that enables students to master content goals. She also shares ways to bring students into the assessment cycle so they can monitor their own learning, maximizing motivation and engagement. *So What Do They Really Know?* includes a wealth of information: Lessons from Cris's classroom Templates showing how teachers can use the workshop model to assess and differentiate instruction Student work, including samples from linguistically diverse learners, struggling readers, and college-bound seniors Anchor charts of student thinking Ideas on how to give feedback Guidelines that explain how conferring is different from monitoring Suggestions for assessing learning and differentiating instruction during conferences Advice for managing ongoing assessment Cris's willingness to share her own struggles continues to be a hallmark of her work. Teachers will recognize their own students and the challenges they face as they join Cris on the journey to figure out how to raise student achievement.

The Role of the Speech-Language Pathologist in RtI Plural Publishing, Incorporated 2018-01-08 *The Role of the Speech-Language Pathologist in RtI: Implementing Multiple Tiers of Student Support* is an innovative resource for school-based speech-language pathologists (SLPs). The author examines the current interaction among special and general educators and identifies how SLPs best fit into a multitiered/response to instruction process. This collaboration requires school staff share the same vision on the operation of the system, understand their respective roles, and merge the curricular with the developmental perspective to build basic skills in support of student performance growth. General educators have traditionally utilized the language of curriculum (e.g., standards, pacing guides, formative and summative assessments) to talk about student goals and achievement. Special educators, including SLPs, most often utilize the language of development (e.g., norms, percentile ranks, development milestones) to measure student growth. *The Role of the Speech-Language Pathologist in RtI* assesses this apparent clash in nomenclature and identifies new ways for collaboration and cooperation among faculty and administration. In order for the SLP to be an effective partner in the development and implementation of RtI, the author proposes that SLPs should: understand the "language" of general education, be able to "translate" the curricular needs of students into skill-based units that can be measured and progress-monitored, have full understanding of the developmental progression of skills and how that progression links to curriculum standards, and be knowledgeable on evidence-based practices that can have a meaningful impact on closing developmental gaps and result in higher achievement outcomes. This text provides the blueprint for the implementation of a system of student support that was envisioned in the 2004 reauthorization of the Individuals with Disabilities Education Improvement Act (IDEIA). Unlike other books on RtI, this essential resource addresses the very specific roles that different school-level professionals must play to make the system effective. No other text provides SLPs with such a comprehensive, schoolwide perspective on the different roles in the process, the different "languages" used by the professionals in those roles, and how to navigate those different perspectives.

Prioritizing the Common Core Larry Ainsworth 2013 The consensus among educators nationwide is that in-depth instruction paired with focused assessment of essential concepts and skills are far more effective than superficially covering every concept and skill in the standards. Educators are faced with the task of teaching all standards while meeting the extraordinary range of student learning needs. *Prioritizing the Common Core* offers common sense solutions to the dilemmas teachers face today in implementing the new, more rigorous national standards. Chapters present a rationale for prioritizing the Common Core, a step-by-step process for prioritizing standards in language arts and mathematics, strategies for soliciting feedback and input from everyone in the district or school prior to the final determination of the Priority Standards, and detailed summaries of the process schools in six different districts used to identify their Priority Standards, with accompanying commentary by those who directed the work.
