Consider Phlebas Iain M. Banks 2009-12-01 The first book in Iain M. Banks's seminal science fiction series, The Culture. Consider Phlebas introduces readers to the utopian conglomeration of human and alien races that explores the nature of war,

morality, and the limitless bounds of mankind's imagination. The war raged across the galaxy. Billions had died, billions more were doomed. Moons, planets, the very stars themselves, faced destruction, cold-blooded, brutal, and worse, random. The Idirans fought for their Faith; the Culture for its moral right to exist. Principles were at stake.

There could be no surrender. Within the cosmic conflict, an individual crusade. Deep within a fabled labyrinth on a barren world, a Planet of the Dead proscribed to mortals, lay a fugitive Mind. Both the Culture and the Idirans sought it. It was the fate of Horza, the Changer, and his motley crew of unpredictable mercenaries, human and machine, actually to find it, and with it their own destruction.

The Maritime Engineering Reference Book Anthony F. Molland 2011-10-13 The Maritime Engineering Reference Book is a one-stop source for engineers involved in marine engineering and naval architecture. In this essential reference, Anthony F. Molland has brought together the work of a number of the world's leading writers in the field to create an inclusive volume for a wide audience of marine engineers, naval architects and those involved in marine operations, insurance and other related fields. Coverage ranges from the basics to more

advanced topics in ship design, construction and operation. All the key areas are covered, including ship flotation and stability, ship structures, propulsion, seakeeping and maneuvering. The marine environment and maritime safety are explored as well as new technologies, such as computer aided ship design and remotely operated vehicles (ROVs). Facts, figures and data from world-leading experts makes this an invaluable ready-reference for those involved in the field of maritime engineering. Professor A.F. Molland, BSc, MSc, PhD, CEng, FRINA. is Emeritus Professor of Ship Design at the University of Southampton, UK. He has lectured ship design and operation for many years. He has carried out extensive research and published widely on ship design and various aspects of ship hydrodynamics. * A comprehensive overview from best-selling authors including Bryan Barrass, Rawson and Tupper, and David Eyres * Covers basic and advanced material

With each new discovery, Hohn learns of another loose thread, and with each successive chase, he comes closer to understanding where his castaway quarry comes from and where it goes. In the grand tradition of Tony Horwitz and David Quammen, *Moby-Duck* is a compulsively readable narrative of whimsy and curiosity.

A Supposedly Fun Thing I'll Never Do Again David Foster Wallace 2009-11-23 These widely acclaimed essays from the author of *Infinite Jest* -- on television, tennis, cruise ships, and more -- established David Foster Wallace as one of the preeminent essayists of his generation. In this exuberantly praised book -- a collection of seven pieces on subjects ranging from television to tennis, from the Illinois State Fair to the films of David Lynch, from postmodern literary theory to the supposed fun of

traveling aboard a Caribbean luxury cruiseliner -- David Foster Wallace brings to nonfiction the same curiosity, hilarity, and exhilarating verbal facility that has delighted readers of his fiction, including the bestselling *Infinite Jest*.

often described as the "fifth façade", the flat roof is extremely popular with architects. Its essential task is to shelter the space beneath it from the elements. Beyond this, the use of flat roofs may be optimized by integrating them as green roofs, roof terraces, circulation areas, and even productive solar roofs. In practice, however, their correct and professional realization is a highly exacting task: in addition to providing the planner with basic rules of construction and design, the *Flat Roof Manual* also supplies an overview of the use and construction types as well as the standard assemblies for flat roofs. most commonly asked questions by the end user, that is, JMOs in the hospital training environment. Law updates and other relevant materials (including guidelines and links to relevant Health Department documents) will be provided on the accompanying Evolve site. Written by a proven author team, each an expert in the medico-legal and/or ethical fields. Clinical problems will be outlined with cross-referencing to the appropriate sections of the handbook. These questions will be posed in the style and format used by clinicians, for example: 'What if I get sued?' 'What do I do if someone refuses treatment?' 'What deaths do I refer to the Coroner?' 'What if I make a mistake?' 'Who makes decisions about a child's treatment?'

Travels in West Africa Mary Kingsley 2019-06-27 Mary Henrietta Kingsley was an English ethnographic and scientific writer and explorer whose travels throughout West Africa and resulting work helped shape European

perceptions of African cultures and British imperialism. After a preliminary visit to the Canary Islands, Kingsley decided to travel to the west coast of Africa. The only non-African women who regularly embarked on (often dangerous) journeys to Africa were usually the wives of missionaries, government officials, or explorers. Exploration and adventure were not seen as fitting roles for women in the Victorian era. Yet, when Mary Kingsley's invalid parents died within six weeks of each other, she followed in her explorer father's footsteps and traveled to Africa against her society's every convention. Here is her lively and witty account of that journey, an immediate bestseller when it first came out in 1897 and every bit as gripping today. Kingsley's complicated and indomitable character shines through in each sentence, as she describes hacking, marching, and climbing her way through the continent. After more than a century, she remains a feminist icon and

Commanding the Waterways Jeffrey L.

Rodengen 2008 As Sea Ray approaches its 50th anniversary, the commitment to quality and innovation that founder C. N. Ray instilled in the company decades ago remains stronger than ever. Sea Ray's unique philosophy, which centers on design excellence and dealer relationships, has helped the company thrive since the opening of its first plant in Oxford, Michigan, in 1959. Over the years, Sea Ray has faced many challenges, from inflation to oil embargoes to the "Great Boating Depression." Through a combination of strong dealer relationships—which help ensure customer satisfaction and build brand loyalty—and a dedication to quality and innovation, Sea Ray strengthened its business and increased profitability in spite of those tough times. Today, Sea Ray produces more than 40 different boat models with worldwide sales totaling nearly \$1 billion a year. Boasting the

widest variety of pleasure boats and one of the highest customer satisfaction ratings in the world, Sea Ray is now the largest manufacturer of superior-quality fiberglass boats, with seven U.S.-based manufacturing facilities and many dealers across the globe. Sea Ray's desire to create high-quality boats and its dedication to exceptional service keep the company at the top of the marine industry. *Commanding the Waterways: The Story of Sea Ray* provides a compelling account of the immediate affect Sea Ray had on the boating industry as well as its continued growth and success since entering the business 50 years ago.

Honolulu Yank office in July 1943. "Here is contained an account of the past eight and one-half months," he wrote in his last entry, "a period which I shall never forget." The next morning he was on a plane headed back to the South Pacific and the New Georgia battleground. Morriss was working out of the press camp at Spa, Belgium, in January 1945, when he learned that the diary he had kept in the South Pacific had arrived in a plain brown wrapper at the New York office. He was so happy "to know that this impossible thing had happened," he wrote to his wife, that he helped two friends "murder a quart of scotch." What was preserved and appears in print here for the first time is a unique chronicle of the war in the South Pacific from the perspective of a sensitive twenty-four-year-old sergeant. This is an intensely personal account, reporting the war from the ridge known as the Sea Horse on Guadalcanal, from the bars and dance halls of Auckland to a B-17 flying through the moonlit night to

bomb Japanese installations on Bougainville. Morriss thought deeply and wrote movingly about everything connected with the war: the sordiness and heroism, the competence and ineptitude of leaders, the strange mixture of constant complaint and steady courage of ordinary GIs, friendships formed under combat stress, and, above all, what he perceived to be his own indecisiveness and weaknesses. Ronnie Day introduces Morriss's diary and illuminates the work with extensive notes based on private papers, government documents, travel in the Solomon Islands, and the recollections of men mentioned in the diary.

Speculator John Hunt 2016-09-27 "Halfway between Frederick Forsyth's *Dogs of War* and Ayn Rand's *Fountainhead*. The gold mine in the jungle, the mercenaries, and the child soldiers keep you turning the pages. A morality tale with modern twists." -John Mackey (Founder, Whole Foods Market and author of *Conscious Capitalism*) The greatest gold discovery in history draws a young Charles Knight to West Africa, where he unearths deception, violence, and romance. Xander Winn-a Dutchman on his own mission-mentors Charles on his voyage into the world of speculation and African politics. But a psychopathic rebel leader, the purveyors of a six-billion-dollar

fraud, a team of mercenaries bent on early retirement, and the US government all get in his way. Everyone wants him dead. But Charles plans to strike it rich. **ADVANCE PRAISE FOR SPECULATOR** "Speculator uses the cover of a thrilling tale of international intrigue to provide an economic and moral defense of the much-maligned speculator and an economic and moral condemnation of those who profit via force and fraud. Doug Casey and John Hunt have provided an invaluable service to those looking for unique ways to spread the ideas of liberty." -Dr. Ron Paul "Speculator may prove to be the first in a new genre of fiction. Give this book to all your friends and enemies." -John Hart (Author of *Redemption Road*) "Adventure... intrigue... philosophy... politics... you'll find it all in this fast-paced novel from Doug Casey and John Hunt. Most important, you'll find thoughts - the kind of thoughts that will make you think too." -Bill Bonner (Author of *Empire of Debt*)

"Speculator will keep you thinking long past the conclusion and for years to come."-Robert Ringer (Author of Looking Out for #1 and Winning Through Intimidation)
"Speculator is a roller-coaster lesson on the arcane world of gold-mine investing. An African revolution, massive fraud with massive profits and losses-the novel is such fun you don't notice how much you are learning. But, mostly, it is a good read with a unique protagonist." -Wendy McElroy (Author of Liberty for Women)
"Move over John Galt and Humphrey Bogart, Speculator has created an old-fashioned hero with contemporary style and sex appeal. Expert cicerones lead us through the dark world of African mining and international finance. It is a riveting tale, perfect for a day at the beach or a long-winter's-night read. Pure gold." -Richard Harteis (Author of Marathon and Publishing Director of Poets-Choice.com)
"Passionately pointed and provocative."-David Brin

(Author of Earth and The Postman) "Speculator combines the fast-paced action of a Dirk Pitt adventure story with the cerebral message of an Ayn Rand novel. The authors' knowledge of how markets, mining, and governments work is impressive, yet the book reads like a day at the beach. Crisp, intelligent, and witty, this new adventure series might even out-Rand Rand." -Jo Ann Skousen (Professor of English Literature, Chapman University)

making. It captures the beauty and awe of the heavens through images from antiquarian celestial prints and star atlases. This book uniquely combines a number of features: 1) the history of celestial cartography is traced from ancient to modern times; 2) this development is integrated with contemporary cosmological systems; 3) the artistry of sky maps is shown using beautiful color images from actual celestial atlases and prints; 4) each illustration is accompanied by a legend explaining what is being shown; and 5) the text is written for the lay reader based on the author's experience with writing articles for amateur astronomy and map collector magazines. This updated second edition of 'Star Maps' contains over 50 new pages of text and 44 new

images (16 in color), including completely new sections on celestial frontispieces, deep-sky objects, playing card maps, additional cartographers, and modern computerized star maps. There is also expanded material about celestial globes, volvelles, telescopes, and planets and asteroids.
