*Curriculum Development for Students with Mild Disabilities* Carroll J. Jones 2010 Many teachers of students with mild disabilities experience difficulty writing IEPs, and they lack a foundation in the regular education curriculum of academic skills and sequences associated with each grade level. This book was designed to provide this foundation. Presented in the form of scope and sequence charts that can be used as objectives for the State Frameworks (goals and benchmarks), this resource assists in preparing IEPs, including the new process of identification of children with disabilities through their responses to intervention (RTI). An additional focus is on the impact of federal laws (IDEA and NCLB) on the curriculum and assessment in schools today. The book has been reorganized into ten chapters, including: historical perspectives; early childhood special education curricula; oral expression curricula; reading and listening curricula; written expression curricula; mathematics curricula; educational technology curricula K-12; social and self competence curricula; science curricula; and evaluation reports/case studies (Appendix). The scope and sequence charts were modified to include current national education standards and benchmarks and the skills in each of the academic areas that require annual state assessment. These charts will assist teachers in modifying the general education curriculum for students with mild disabilities and to write complete Individual Education Programs, using age-appropriate and developmentally appropriate teaching and assessment materials. Chapter summaries, included for review purposes, also serve as selective and motivational reading. With special education teachers in short supply and the demands on their time so great, this book will provide a valuable resource for cutting the clutter and moving to the heart of the teaching process: determining what skills students need to move effectively to the next level.

**Response To Student Writing** Dana R. Ferris 2003-02-26 This volume synthesizes and critically analyzes the literature on response to the writing of second language students, and discusses the implications of the research for teaching practice in the areas of written and oral teacher commentary on student writing, error correction, and facilitation of peer response. The book features numerous examples of student texts and teacher commentary, as well as figures and appendices that summarize research findings and present sample lessons and other teaching materials. It is thus simultaneously comprehensive in its approach to the existing

research and highly practical in showing current and future teachers how this material applies to their everyday endeavors of responding to student writing and teaching composition classes. Response to student writing--whether it takes the form of teachers' written feedback on content, error correction, teacher-student conferences, or peer response--is an extremely important component of teaching second language writing. Probably no single activity takes more teacher time and energy. Response to Student Writing is a valuable theoretical and practical resource for those involved in this crucial work, including L2 composition researchers, in-service and preservice teachers of ESOL/EFL writers, and teacher educators preparing graduate students for the teaching of writing.

**Student Writing** Theresa M. Lillis 2002-01-04 Student Writing presents an accessible and thought-provoking study of academic writing practices. Informed by 'composition' research from the US and 'academic literacies studies' from the UK, the book challenges current official discourse on writing as a 'skill'. Lillis argues for an approach which sees student writing as social practice. The book draws extensively on a three-year study with ten non-traditional students in higher education and their experience of academic writing. Using case study material - including literacy history interviews, extended discussions with students about their writing of discipline specific essays, and extracts from essays - Lillis identifies the following as three significant dimensions to academic writing: \* Access to higher education and to its language and literacy representational resources \* Regulation of meaning making in academic writing \* Desire for participation in higher education and for choices over ways of meaning in academic writing. Student Writing: access, regulation, desire raises questions about why academics write as they do, who benefits from such writing, which meanings are valued and how, on what terms 'outsiders' get to be 'insiders' and at what costs.

*Treatment of Error in Second Language Student Writing, Second Edition* Dana Ferris 2011-09-21 Treatment of Error offers a realistic, well-reasoned account of what teachers of multilingual writers need to know about error and how to put what they know to use. As in the first edition, Ferris again persuasively addresses the fundamental error treatment questions that plague novice and expert writing specialists alike: What types of errors should teachers respond to? When should we respond to them? What are the most efficacious ways of responding to them? And ultimately, what role should error treatment play in the teaching of the process of writing? The second edition improves upon the first by exploring changes in the field since 2002, such as the growing diversity in what is called "L2 writers," the blurring boundaries between "native" and "non-native" speakers of English, the influence of genre studies and corpus linguistics on the teaching of writing, and the need the move beyond "error" to "second language development" in terms of approaching students and their texts. It also explores what teacher preparation programs need to do to train teachers to treat student error. The second edition features \* an updating of the literature in all chapters \* a new chapter on

academic language development \* a postscript on how to integrate error treatment/language development suggestions in Chapters 4-6 into a writing class syllabus \* the addition of discussion/analysis questions at the end of each chapter, plus suggested readings, to make the book more useful in pedagogy or teacher development workshops

**Student Writing** Lucy K. Spence 2014-04-01 Education professionals interested in understanding student writing will want to read this book. It describes "Generous Reading," a novel method of approaching the writing of culturally and linguistically diverse students. This book addresses the increasing diversity present throughout schools across the U.S. and in other countries. Drawing from current research and theory in linguistics and composition, Spence has developed a way for teachers to tap into the cultural worlds of students and draw upon their linguistic understandings in order to help them improve their writing. The book is based on research projects conducted in the southwest and southeast regions of the United States. The chapters on language variation, culturally relevant instruction, and language transfer will also be of interest to writing teachers. Spence has presented the Generous Reading method across the nation and internationally where audiences have been eager to try out the methods in their classrooms with students of all ages. University professors have used Generous Reading in teacher education courses. This methodology has potential to change teachers' perspectives on student writing and illuminate writing strengths previously overlooked.

Student Writing in the Quantitative Disciplines offers instructors in math-based disciplines meaningful approaches to making their coursework richer and more relevant for their students, as well as satisfying institutional imperatives for writing curricula. This important resource provides instructors with the hands-on skills needed to guide their students in writing well in quantitative courses at all levels of the college curriculum and to promote students' general cognitive and intellectual growth. Comprehensive in scope, the book includes: Ideas for using writing as a means of learning mathematical concepts Illustrative examples of effective writing activities and assignments in a number of different genres Assessment criteria and effective strategies for responding to students' writing Examples of ways to help students engage in peer review, revision, and resubmission of their written work "Those of us who spend our lives urging faculty in all disciplines to integrate more writing into their courses have wished for the day when someone like Patrick Bahls would step forward with a book like this one."—Chris M. Anson, University Distinguished Professor and director, Campus Writing and Speaking Program, North Carolina State University "Written by a mathematician, this readable, theoretically sound book describes practical strategies for teachers in the quantitative sciences to assign and respond to students' writing. It also describes numerous approaches to writing that engage students in disciplinary learning, collaborative discovery, and effective communication."—Art Young, Campbell Professor of English emeritus, Clemson University "Loaded with practical advice, this timely, important, and engaging book will be an invaluable resource for instructors wishing to bring the benefits of writing-to-learn to the quantitative disciplines. As a mathematician thoroughly grounded in writing-across-the-curriculum scholarship, Bahls brings

humor, classroom experience, and pedagogical savvy to a mission he clearly loves—improving the quality of student learning in math and science."—John C. Bean, professor, Seattle University, and author, Engaging Ideas
